NorthGate College EduFLEX: Considerations and Experiences

Lessons learnt from implementing
a flexible learning hybrid system.

EDUFLEX

NGC FLEXIBLE LEARNING EXPERIENCE

Edu-Flex is technology-based solution which facilitates an immersive teaching and learning experience.

- The system allows students who are on the physical campus and those in a virtual space to have the same quality instruction in real time.

EDUFLEX

NGC FLEXIBLE LEARNING EXPERIENCE

EduFlex allows virtual students to interact and feedback with their in-classroom peers.

- Each Edu-Flex classroom facilitates live streaming of a physical classroom with teacher/instructor, a quota of socially distanced students, & technology tools to transmit course material to virtual

The system also incorporates Google Classroom, Google Meet and Google Apps for Education with which staff, students and their households have been familiar for over eight years.

EDUFLEX – KEY CONSIDERATIONS

To provide a seamless classroom experience for students who are in different physical locations

- No difference in quality instruction whether they are on/off campus

To ensure there is minimal adjustment to the current teaching methods used by staff

To ensure a healthy balance is maintained for ongoing curriculum delivery

- The combination of activities + screen time considerations + MOH stipulations

To ensure dynamic aspects of school life and culture continue with minimal adjustments

EDUFLEX – LESSONS LEARNT
