Satellite-Mobile Regional Outreach **What Makes Satellite Unique**

Coverage

Reliability

Resilience

Reaching everyone, everywhere, at all times

The Only Means to Connect the Unconnected

Source: GSMA Intelligence

Satellite is **the** only means for reaching populations & geographies outside of mobile network coverage

Satellites Provide Connectivity Everywhere

By 2030.....

More than 500 million people will connect via Satcom, twice as much as today

Global socio-economic benefits of Satcom will exceed \$250 billion

Today's society relies on connectivity

Terrestrial infrastructure is limited and leaves a connectivity gap

Satcom bridges gap & provides universal and meaningful connectivity to all

Connecting Everyone & Everywhere

Satellite-Mobile Regional Outreach

Existing partnerships between telecoms & satellite operators have a potential coverage footprint of more than 2 billion subscribers

Note: figures are number of mobile subscribers for each operator, and therefore the addressable footprint for a given partnership assuming national scale satellite coverage.

COLLABORATION IS KEY

Cooperation Agreement

Memorandum of Intent

Partnerships & Collaborations

...and many more

For more information g contact GSOA on
