

SMART SEAS TOOLKIT for DISASTER RESILIENCE

ITU/CTU/TATT Project

*Joint Meeting of 51st Executive Council and
30th General Conference of Ministers*

CTU ICT Week 2024 | St. Kitts & Nevis | 1 Oct 2024

Tariq Mohammed | Project Officer | ITU

Meaningful Connectivity for All

- Initiatives to promote meaningful **connectivity for all** generally *exclude* some vulnerable populations
- Forms of exclusion include:
 - affordability
 - accessibility
- Accessible, affordable ICTs requires action by several agents within the ecosystem: policy makers, regulators, service providers, innovators, etc.

A Vulnerable Group: Small-Scale Fishers

- Fishing often ranked as most dangerous job; 32,000 annual fatalities @ sea (FAO 2020)
- Low visibility of small-scale fisher (**SSF**) vulnerability:

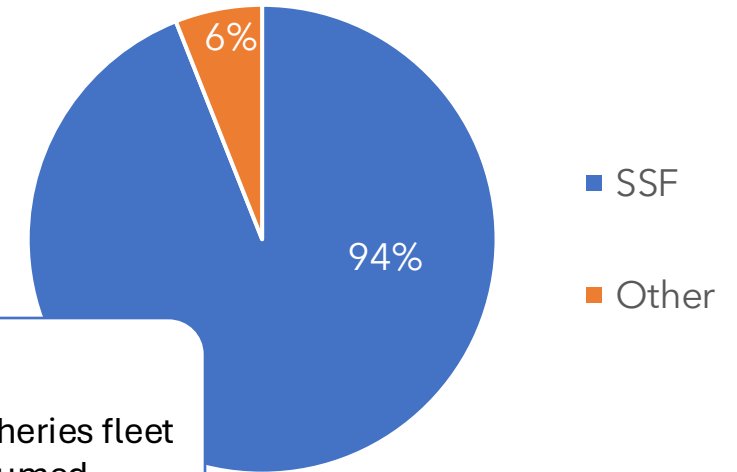

- **Livelihoods:** digitally & financially
- **Lives:** physically in undecked vessels

ICTs critical to both
lives & livelihoods

Simply having ICTs is not enough,
enabling environment essential for
affordable, accessible ICTs

Global Fisheries Fleet

SSF:

- ≈ 94% of global fisheries fleet
- ≈ 40% of fish consumed

Strengthening Enabling Env: Smart Seas Project

- Smart Seas Toolkit for Disaster Resilience (Smart Seas) Project: joint initiative supported by the Government of Trinidad and Tobago

- Aim: to increase the resilience & preserve the lives of SSF through ICTs with emphasis on the **enabling environment** ¹
- Enabling environment *essential* for **affordable** & **accessible** ICTs

¹ the set of actors, policies, regulations, frameworks, capacity, operations and associated engagements among actors and agencies which facilitate maritime communications to increase the resilience of small-scale fishers

Scope & Dimensions

Scope:

Beneficiary Sector: Fisheries

Dimensions:

Policy & Regulation

Operations

Capacity

Technology

Transferable: other sectors & underserved or vulnerable communities

Extensible: regionally & globally

Lifesaving & Livelihood-Supporting Comms

Essential (emergency comms: lifesaving)

VHF Radio
Source: ICOM

VHF-DSC Radio
Source: Standard Horizon

AIS-SART
Source: SAMYUNG ENC

Satellite EPIRB
Source: Daniamant

GMDSS²

Non-essential (regular comms & livelihoods)

Satellite Phone
Source: Inmarsat

PLBs
Source: ACR

Cellular Phone

Direct to Device
Source: Thuraya

Non-GMDSS

² Global Maritime Distress and Safety System

Smart Seas Outputs, Outcomes & Impacts

OUTPUTS

Current State  Best practice

Gap Analysis

SMART SEAS

Smart Seas Toolkit

Equipment

Agenda for Accessible Comms@Sea

OUTCOMES

Capacitated ecosystem

Strengthened enabling environment

IMPACT

Resilient SSF

Gap Analysis: Gaps & Other Findings in...

UN Conventions & Recs

- **Overlap in notification reqs**
IMO GISIS⁴; ITU MARS⁵/List IV
- **Compliance**
e.g. notification³: 80% of CTU Member States have never notified ITU MARS on their coast stations
- **Country membership**
IMO: 30% , FAO: 20% , WMO: 15%

Ecosystem

- **Knowledge of process flows**
What agency is responsible for discharging mandates under UN Conventions & Recs?
- **Roles & responsibilities**
Gaps & overlaps: notification, registration, ...
- **Engagement**
Room for more collaborations and support across agencies within the ecosystem

Policy Environment

- **Currency of policies & related artefacts**
Consider maritime areas and SSF as underserved in USF
- **Official agreements**
e.g. on rescue co-ordination

Regulatory Environment

- **Inclusive regs & related artefacts**
Maritime area coverage in USF
- **Official documentation**
e.g. monitoring measures

Operations

- **Data** on national shore-based facility operations
Channel usage, available times, etc.
- Radio **coverage** within MRCC

Capacity

- **Relevant curricula & certification schemes** for Caribbean SSF & coast stations
Reduced & context-appropriate

³ of maritime coast stations to ITU's MARS and List IV and IMO's GISIS

⁴ Global Integrated Shipping Information System

⁵ Maritime mobile Access and Retrieval System

⁶ World Meteorological Organization

Opportunity Estimator

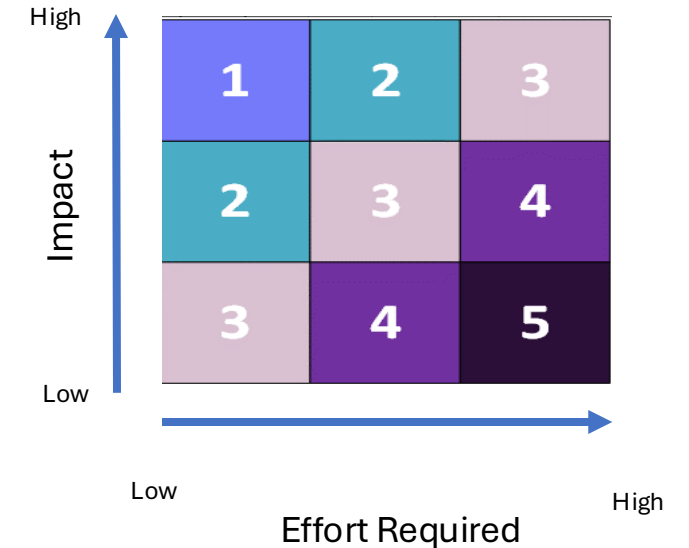

Extract from the Radio Regulations Edition of 2024, Regulation 20.16:

“**Administrations** shall take all appropriate measures to **notify the Radiocommunication Bureau** immediately of any **changes in the operational information** contained in **Lists IV** and **V**, in view of the importance of this information, particularly with regard to safety. In the case of the data published in List V, which is also made available online through MARS, administrations shall communicate those changes at least once a month. In the case of other publications, administrations shall communicate the changes in the information contained in them as soon as possible”

Example Scenario: SMA Status on List IV (Coast Stations & Special Service Stations) notifis

The national SMA has not been notifying on List IV although notification responsibilities are listed in agency policy

High Impact (4 or 5), **Low Effort** (1 or 2): Complying with notification reqs are straightforward & significantly enhances safety & regulatory compliance.

Impact:

What impact does this have on SSF safety & enabling environment?

Effort required:

- Agency responsible? ✓
- Stated in national law/policy? ✓
- Used in actual practice? ✗

FOOTNOTES

1	Related to data collection for SSF-related maritime communications
2	E.g. Code of Safety for Small Commercial Vessels (though not applicable to SSF)

Sample Data for CTU Member States

Maritime Coverage in USF Frameworks

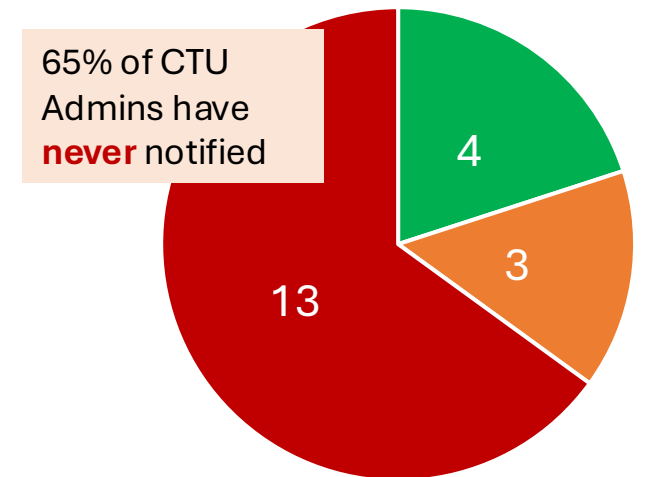

■ Yes ■ No

List IV Notification Status (Pre-Smart Seas/Dec 2021)

■ Have Notified ■ Have Never Notified

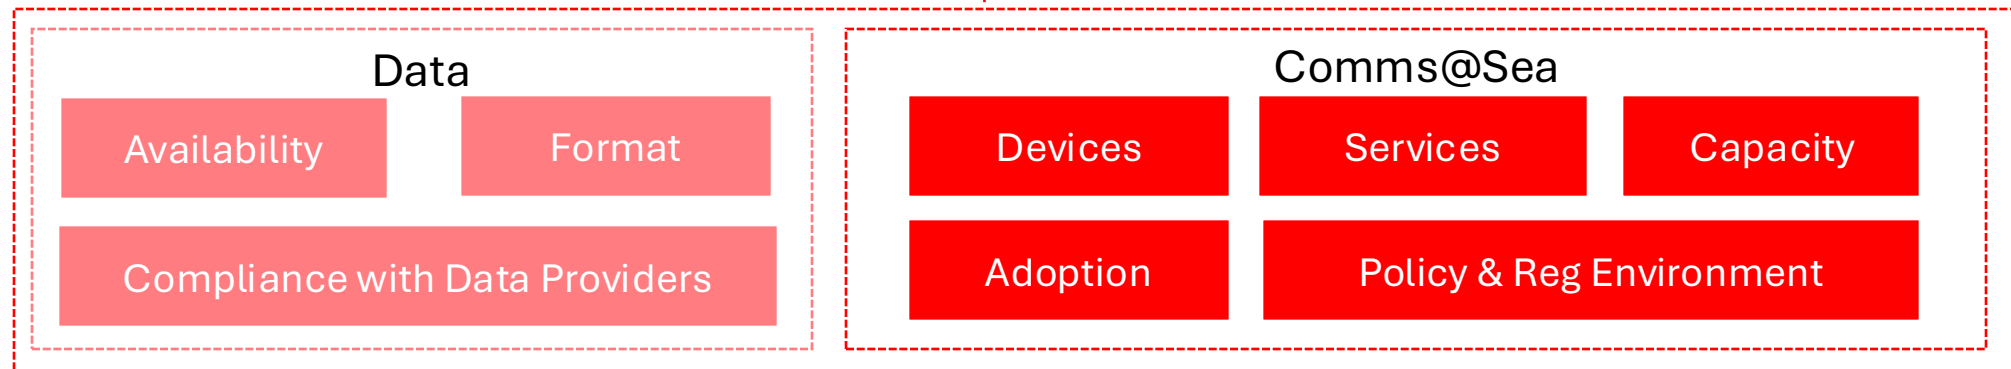

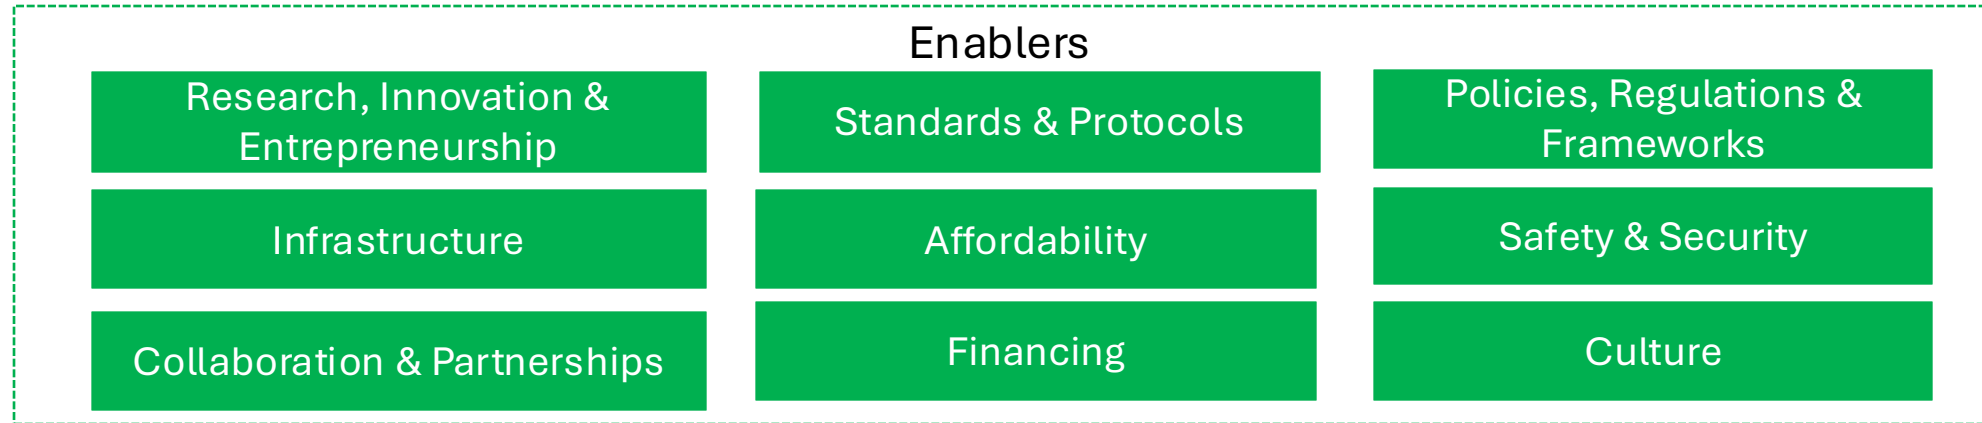

List IV Notification Status (as of Sep 2024)

■ Have Notified ■ Notifying

Smart Seas has supported 2 CTU Member States in filling notification gaps, and is currently working with 3 more

Agenda for Accessible Comms@Sea 4 SSF

Setting Priorities Workshop | Mar 2024

COMING SOON:
Agenda Validation Workshop
Online | 2 days | Jan 2025

An Agenda for
Accessible Communications @ Sea
Solutions for Small-Scale Fishers

Interim Report
Oct 2024

Recommendations

1. Ongoing review & revision of USF Frameworks, to align with findings of digital inclusion surveys
2. Ongoing review and revise national policies, regs & frameworks, as appropriate, to consider:
 - i. maritime environment within universal service scope
 - ii. vulnerable populations who earn their living at sea
3. Ongoing engagement among and within sectors and entities with overlapping strategic objectives
4. Collaboration across sectors and focal points is **essential** to achieve accessible, affordable ICTs
