

ACAI Project.

Amazonian Cybersecurity and Artificial Intelligence

Mme Allyx FONTAINE

Wednesday, 23 September 2026

Context and ambition

01.

Train the people of French Guiana

On the challenges of artificial intelligence and cybersecurity.

02.

Develop local expertise

Sustainable expertise that reduces reliance on outside hires.

03.

Build a shared vision

An Amazonian and Caribbean vision tailored to French Guianese businesses and public administrations.

Three complementary pillars

Awareness

Understand the risks, opportunities and responsible uses of AI and cybersecurity.

Training

Train multipurpose experts rooted in Amazonian and Caribbean realities.

Internationalisation

Develop incoming and outgoing mobility opportunities for students in the Amazon and the Caribbean.

Pillar 1 Awareness

Risks, performance and trust

Citizens, young people, women, businesses and public administrations : everyone should be able to understand and take action.

01.

Understand and prevent

Cyber risks and AI-related risks.

02.

Performance and security

Use AI and cybersecurity as drivers of performance, efficiency, resilience, innovation and data protection.

03.

Reduce the digitale divide

Local outreach tailored to each audience.

Pillar 2 Training

Build skills that stay, spread and make an impact.

01.

Train multipurpose experts

Bring together AI, cybersecurity, data, research and business challenges.

03.

Amazonian and Caribbean vision

Co-create and share expertise from French Guianese across the Amazon and the Caribbean.

02.

Local self-sufficiency

Develop local skills sustainably.

04.

Master ACAI

Custom-made Master's Degree in AI and Cybersecurity tailored for Caribbean and Amazonian needs.

Pillar 3

Internationalisation

A recognised training program open to Europe international networks.

Amazonian and Caribbean territories share challenges and opportunities in AI and cybersecurity.

Outgoing mobility : Enable French Guianese students to study and train in the Amazon, the Caribbean and beyond.

Incoming mobility : Welcome students from the Amazon and the Caribbean to French Guiana.

What internationalisation brings to students

Experiences that strengthen academic and professional pathways and regional ties.

01.

Two-way mobility

For students in the Amazon and the Caribbean.

02.

Credibility in the job market

Recognised and valued experience.

03.

An opening to the world

New perspectives and connections.

04.

Cross-disciplinary skills

Scientific, technical and soft skills that differ and complement one another.

05.

Language and intercultural exchange

Broaden skills and perspectives.

06.

Lecture in English

Aim: all the lectures provided in English.

French Guiana, a strategic crossroads

between Europe, the Caribbean and the Amazon, French Guiana is turning its position into an asset.

Caribbean integration already underway

CARICOM & CTU

A stronger regional institutional foothold and new cooperation networks.

Regional research

Active collaborations with the Guiana Shield and the Caribbean.

Martinique & Guadeloupe

Historic, academic and cultural ties that facilitate exchange.

Networks to strengthen

A sustainable network for sharing expertise and mobility opportunities.

Our regional Ambition

Make French Guiana a leading regional hub for AI and Cybersecurity.

Cooperate, support one other and learn together.
Empower Amazonian and Caribbean young people to take part in tomorrow's project with our partners.
